

## National Resource Directory Widgets

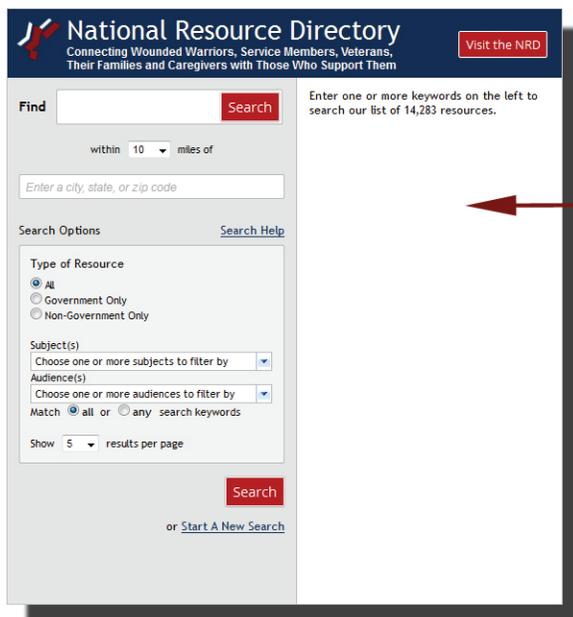

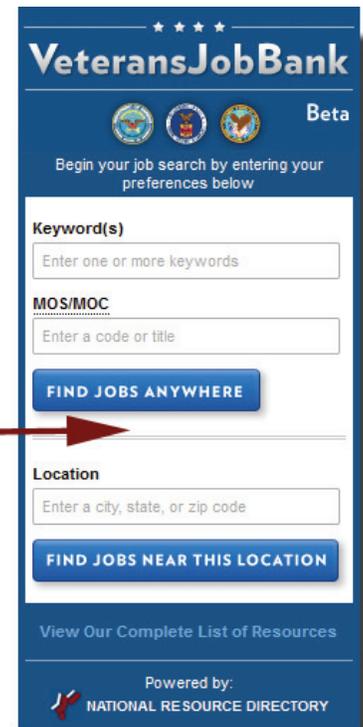

Are you looking for a way to support the wounded warrior, Veteran and military communities? The National Resource Directory (NRD) offers three widgets that allow your website's visitors to access NRD resources without leaving your site.

A widget is an online application built by one website for display on another website, and can be embedded into Web pages, blogs or other online environments. Simple and easy to install, each widget is maintenance-free and updates automatically.

**The NRD Resource Widget** allows you to display resources from a specific state and/or subject area directly on your website. Resources will appear within the widget once it is embedded.

**The Veterans Job Bank Widget** allows users to search by keyword, military occupational code (MOC) and/or location for jobs posted by employers who want to hire Veterans. Search results will open in a separate window.

**The NRD Search Widget** provides immediate access to the more than 14,000 resources on *NRD.gov*. Users simply enter any keyword to begin their search. The NRD Search Widget provides organizations, government agencies and individuals with a simple, cost-effective alternative to creating their own directory of resources. Search results will display directly within the widget.

Show your support for our nation's wounded warrior, Veteran and military communities by adding an NRD Widget to your website today! Visit [www.NRD.gov/widget](http://www.NRD.gov/widget).
